

Triceratops

TRY-SERR-UH-TOPS (say it out loud!)

It ate plants!

a big bony frill,
like a shield

two long horns over
its eyes, a short
one on its nose

HORNS AND BEAK

Two long horns over the eyes, a short one on the nose, and a beak like a parrot's.

FRILL

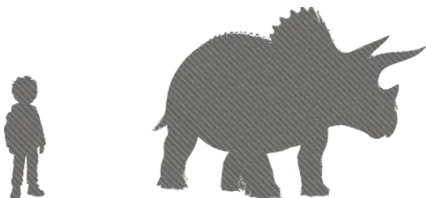

A big bony frill behind its head, like a shield.

LEGS

It walked on four thick legs.

HOW BIG?

Kip

Triceratops

About 9 meters long. Bigger than an elephant!

Kip's note:

Three horns, one frill, one beak. I counted the horns twice to be sure.

Quick facts

- | | |
|-----------------|--|
| When | Late Cretaceous, about 68 to 66 million years ago |
| Where | What is now the western USA |
| How big | Bigger than an elephant, with a head as big as a door. |
